

FIRST - BECAUSE IT LASTS.

WHO IS WARATAH?

WARATAH – INNOVATIVE STEEL FENCING SOLUTIONS

Waratah don't just develop and manufacture premium fencing products, we provide fencing solutions.

Waratah is the brand that can be trusted to not let you down. We have earned our reputation by developing innovative products to meet the needs of rural farming for 130 years. Quality raw materials and a proven manufacturing process are the reasons why a Waratah fence is a great investment.

Our value is measured not in terms of price, but the premiums of long-lasting performance, ease of handling and savings on labour and maintenance costs.

FIRST - BECAUSE IT LASTS.

QUICK TO BUILD – BUILT TO LAST

CURRENTLY USING TIMBER? TRY STEEL!

Steel fencing products are an excellent alternative to traditional timber or concrete fencing practices. Waratah are at the forefront of steel fencing technology and are seen as a viable alternative to timber post and batten fences, timber/concrete post and rail fences, and timber/concrete post and wire or netting (prefabricated) fence designs.

Challenge your traditional fencing practices and try Waratah steel fencing solutions – Quick to build, built to last!

BUILDING YOUR WARATAH FENCE

1		PLAN YOUR FENCE LINE & ERECT STRAINER ASSEMBLIES
		<p>Choose your strainer post</p> <ul style="list-style-type: none"> – round Ezypipe®, or – angled Ezyslot® <p>Add the multi-purpose stay</p> <ul style="list-style-type: none"> – Adjusta-stay®
2		DRIVE IN YOUR FENCE POSTS
		<p>Choose your line post</p> <ul style="list-style-type: none"> – Jio® Star® - standard size (commonly referred to as “Y” post, “waratahs”, steel standard) <p>Need more strength - add the intermediate post</p> <ul style="list-style-type: none"> – Jio MaxY® - twice the size of a standard
3		CHOOSE YOUR PREFERRED WIRE
		<p>They all work with Waratah</p> <ul style="list-style-type: none"> – High tensile fence wire (2.5mm) – Mild tensile fence wire (No.8) – Barbed fence wire – Pre-fabricated (netting) fence wire – Netting (hexagonal) fence wire
4		USE FENCING TOOLS
		<p>Choose the right fencing tools to get the job done</p>
		USE FENCING ACCESSORIES
		<p>Choose the right fencing accessories to finish off your new Waratah fence!</p>

THE WARATAH RANGE

There are many innovative fencing products in the Waratah family – strainers & stays, fence posts, tools and accessories.

STRAINER ASSEMBLIES & STAYS

– Simple, fast, strong, adjustable, re-usable

Ezypipe®

Waratah’s round strainer post alternative to traditional timber, pipe and concrete strainer posts. Best suited to medium-soft ground applications where greater surface area and anchor points provide improved ground holding capacity.

Ezyslot®

Waratah’s fastest and easiest angled strainer post to manually install. Best suited to hard-medium ground applications where greater surface area and anchor points provide improved ground holding capacity.

Adjusta-stay®

A fully adjustable and reusable stay system that can be used with the Ezyslot, Ezypipe, and most timber, concrete or pipe strainer posts, making it one of the most versatile stays on the market. Requires no digging and can be installed in less than 5 minutes with correct tools.

FENCE POSTS

– The “waratah” steel fence post is back and it’s not all black!

Jio® Star® and Jio® MaxY® post

The trusted “waratah” steel fence post that New Zealand farmers used throughout their fence lines is back – bigger and better than ever, with not 1, but 2 different profiles designed to tackle even more fencing challenges! A stronger, more ductile post that has more holes. Hot dip gal not only extends the life of the post, but also the fence wire.

Droppers

Fence droppers are used to maintain fence integrity and help spread stock pressure from a single wire, to all wires in the fence, reducing the risk of overloading and subsequent wire breakage.

Gripfast® trellis

A cost effective alternative to traditional trellising system with unique slot design along the length of the steel post for easy height adjustment of foliage wires.

Adjusta-stay with Ezyslot and Ezypipe strainer posts

Adjusta-stay on timber strainer

Ezyslot installation

Tenser sensor

Ringmaster clip gun & clips

Post caps

Jio fence post clips

Gripple Plus wire joiner

Anti-sink plate

Gripple T-clip

FENCING TOOLS

– Simple, fast, portable, re-usable

Ezyslot® and Ezypipe® strainer post driver

These heavy duty strainer post drivers fit over the Ezyslot or Ezypipe post and allows the user to manually raise and lower the unit to drive the strainer post into the ground.

Star® post driver

The Star 80NB post driver provides a fast and easy way to install all “waratah” posts. The 9kg head provides optimum driving force and requires less effort than conventional post driving methods.

Thumpa® pneumatic post driver

An easy way to drive all traditional Waratah posts into virtually any terrain faster than a manual driver, saving time and money.

Wire spinner (spinning Jenny)

The Waratah three-way wire spinner is a multi-purpose tool designed to dispense wire safely. Suitable for safely spinning out plain and barbed wire without tangling or over-running.

Wedgelock® clamp (strainer board)

The Wedgelock clamp, together with the Wizard wire strainer is used to strain prefab fence wire.

Wizard® wire strainer (chain strainer)

The Wizard wire strainers grip wire securely to tension fence wire and is the most efficient method for tensioning plain and barbed wire.

Tenser Sensor® tension gauge

When attached to a fence wire under strain, the Tenser Sensor wire tension gauge is designed to indicate approximate wire tension.

Ringmaster® pneumatic clip gun & clips

The Ringmaster pneumatic clip gun is a fast way to secure clips to fence wires reducing physical effort and increasing the number of clips that can be installed per hour.

FENCING ACCESSORIES

– Simple, fast, designed to fit & stay with the fence

Post cap range

The Waratah range of UV-resistant Star post caps makes the posts safer and more visible, made from HDPE material for strength and fade resistance.

Jio® fence post clips

The Waratah Jio Longlife® fence post clips effectively secure fence wires to posts. Simple, consistent wire attachment that's fast and easy to use.

Gripple Plus® wire joiners

Remove the need to tie or knot wire, join a break, or join the end of one roll of wire to the start of another. Gripples save time and effort when joining wires, tensioning or terminating wire at a strainer post.

Gripple® T-Clip

A great alternative to tying off wire around strainer posts without the need for knots, saving both time and labour. Allows consistent replication and is up to 5 times faster than a manual tie-off.

Anti-sink plate

Waratah anti-sink plates increase the surface area of fence posts to help reduce the chance of posts sinking in soft or disturbed soils.
