

## CUT LENGTH TIE WIRE

## FOR WIRE ATTACHMENT AND GENERAL MAINTENANCE

### Application

WARATAH® Cut Length Tie Wire is an ideal alternative to manually cutting lengths of tie wire for securing fencing wire to posts. Cut to a standard 30cm length, WARATAH Cut Length Tie Wire is coated with Longlife™ technology and will fit into most standard tool belts.

Cut Length Tie Wire is ideal for securing fencing wire to WARATAH GalStar® posts, including GalStar MaxY®, as well as a range of other post types.

### Features & Benefits

WARATAH Cut Length Tie Wire is a convenient way to tie off wire around a fence post and eliminates the need for pre-cutting coils of fence wire into manageable lengths - saving you time and labour when building a fence. The Cut Length Tie Wire can be used for timber, steel and concrete fence posts.

- Easy to manage 30cm (300mm) lengths of Longlife wire
- 2.50mm diameter wire is strong, yet easy to bend and tie off
- Ideal for attaching all WARATAH wire products to most fence post types
- No dangerous sharp edges as associated with mechanical cutters such as drop saws

Wire Diameter	Wire Length	Pack Size / Weight	Suggested Applications
2.50mm	30cm (300mm)	Approx 1000 pieces / 12kg	For attaching fence wire to posts and general maintenance
